

Product accents & accessibility

The target format owns the accent. WCAG AA is the minimum, and only one product accent appears in an interface context.

Product accents

One context, one accent. Master carries the core product; each output format owns its dedicated color.

Usage rules

Do

- Keep the 70 / 20 / 8 paper-soft-ink balance
- Use one product accent per context
- Preserve approved WCAG foreground/background pairs
- Keep all UI typography in Manrope

Do not

- Mix several product accents inside one control
- Use format colors as decoration without meaning
- Invent an unsupported dark theme
- Detach values from shared variables and styles
