

Navigation

The sidebar is an independent, lower-priority scroll area.

Search performance overview

Primary content starts at the top of the internal scroll root.

Indexing

Indexing details remain selectable in the editable PDF.

Core Web Vitals

This content is below the initial viewport.

HTTPS

The full document must contain this section.

Enhancements

The export should span several PDF pages.

Security

The main area, not the sidebar, is the capture surface.

Final static section

Reaching this section triggers dynamic loading.

NESTED_SCROLL_LAZY_BOTTOM

Loaded only after the primary scroll root reaches its bottom.
